Subject: Green Releaf 'Ecoguard' Bacillus licheniformis Labeled for Dollar Spot Only

Follow up to previous postings on Green Releaf's new product ***Bacillus licheniformis*** :

Spoke with Novozyme Biological's rep Scott Inman and have found the following:

- Product has been submitted to States including NJ for registration; pending approval
- Will be packaged for commercial use; but can be used by homeowners.
- Labeled use will be for **dollar spot only**

They intend to apply for additional uses; they are actively gathering further efficacy data to support other uses.
