Subject: Sustainable Lawn Care for Professionals and Homeowners

Folks,

Please pass on to your colleagues this flyer about a Sustainable Lawncare workshop in Pennington for landscapers, school grounds maintenance staff , municipal parks/public works /golf course people who may be interested to learn more about low impact methods of turf and landscape maintenance. The speakers are excellent and pesticide license credits have been applied for. The Friday, Jan. 11 session is for professionals, the Saturday, Jan. 12 session is for homeowners. If you want to hone your IPM skills, this ovrkshop is for you!

Regards,

Jane Nogaki

Pesticide Program Coordinator
