Pumpkin IPM Scouting Form

Date:	Location:											Scout:				
Field ID		Variety:					Time in: Time out:									
Primary	y Field	Stage	(circle)	: (1) Emg	g.–4 true	leaves (2	2) 4 leaf-	bloom	(3) bloor	n-early fr	uit set (4) de	eveloping fru	uit (5)) mature :	fruit	
Scouting	g Meth	od: 5 c	consecu	ıtive pl	ants X	10 field	locatio	ns. Sa	mples:	* = 10	leaves/site	e, †= who	ole pla	ınt		
Sample	1	2	3	4	5	6	7	8	9	10	Total	Thr.(Y	Thr.(Y/N) Comment			
Stage 1												≥2 at 6 si	ites			
Cucumber Beetle (# beetles/location)																
Squash Bug † Nymph groups/plant												1/plant	•			
Egg masses/plant												1/plant				
Aphids (# of leaves w/≥ 5) *												≥ 20 leav	ves w/≥	5		
Stage 2-5																
Mites (# of leaves) *												Identify location of infestation				
Squash Bug Nymph groups/ site *												If fruit are present, is there distortion or discoloration? Y/N				
Egg masses/site *																
Diseases * Powdery Mildew (# infected leaves)												≥ 1/50 lea	ives			
Presence of any of the following diseases requires a response			P	A	Occasional insect pests						Note	es/Maps				
Bacterial leaf spot					PLI	PLH adults										
Gummy Stem Blight/Black Rot					PLH nymphs											
Virus Symptoms						Thrips										
Phytophthora						ids (avg. es 2-5	=20/leaf/	/site)								
Scab					Oth	er										
Downy Mildew
