Revised April 6, 2020

- NJ Worker Protection Regulations revised for parity with 2015 EPA WPS; some more stringent
- Allows for Third Party Exam Administration

Another NJ Regulation revision due in 2024

- to meet federal Certification & Training regulation revision; expect soil fumigation certification changes

The screenshot shows the website for the State of New Jersey Department of Environmental Protection, Compliance & Enforcement. The page title is "Pesticide Regulations". The URL is https://www.state.nj.us/dep/enforcement/pcp/pcp-regs.htm. The page features a navigation menu on the left, a main content area, and a sidebar on the right. The main content area is titled "Pesticide Regulations" and includes the following text: "N.J.A.C. 7:30", "PESTICIDE CONTROL CODE", "Statutory Authority: N.J.S.A. 13:1D-1 et seq. and 13:1F-1 et seq., particularly 13:1F-4", "Date last amended: April 6, 2020", and "CHAPTER 30 TABLE OF CONTENTS". The text "PESTICIDE CONTROL CODE" is circled in red. The sidebar on the right is titled "DIVISIONS AND PROGRAMS" and includes "Air Enforcement", "Pesticides, Waste and Underground Storage Tank Enforcement", and "Licensing and".

New Jersey Private Applicator

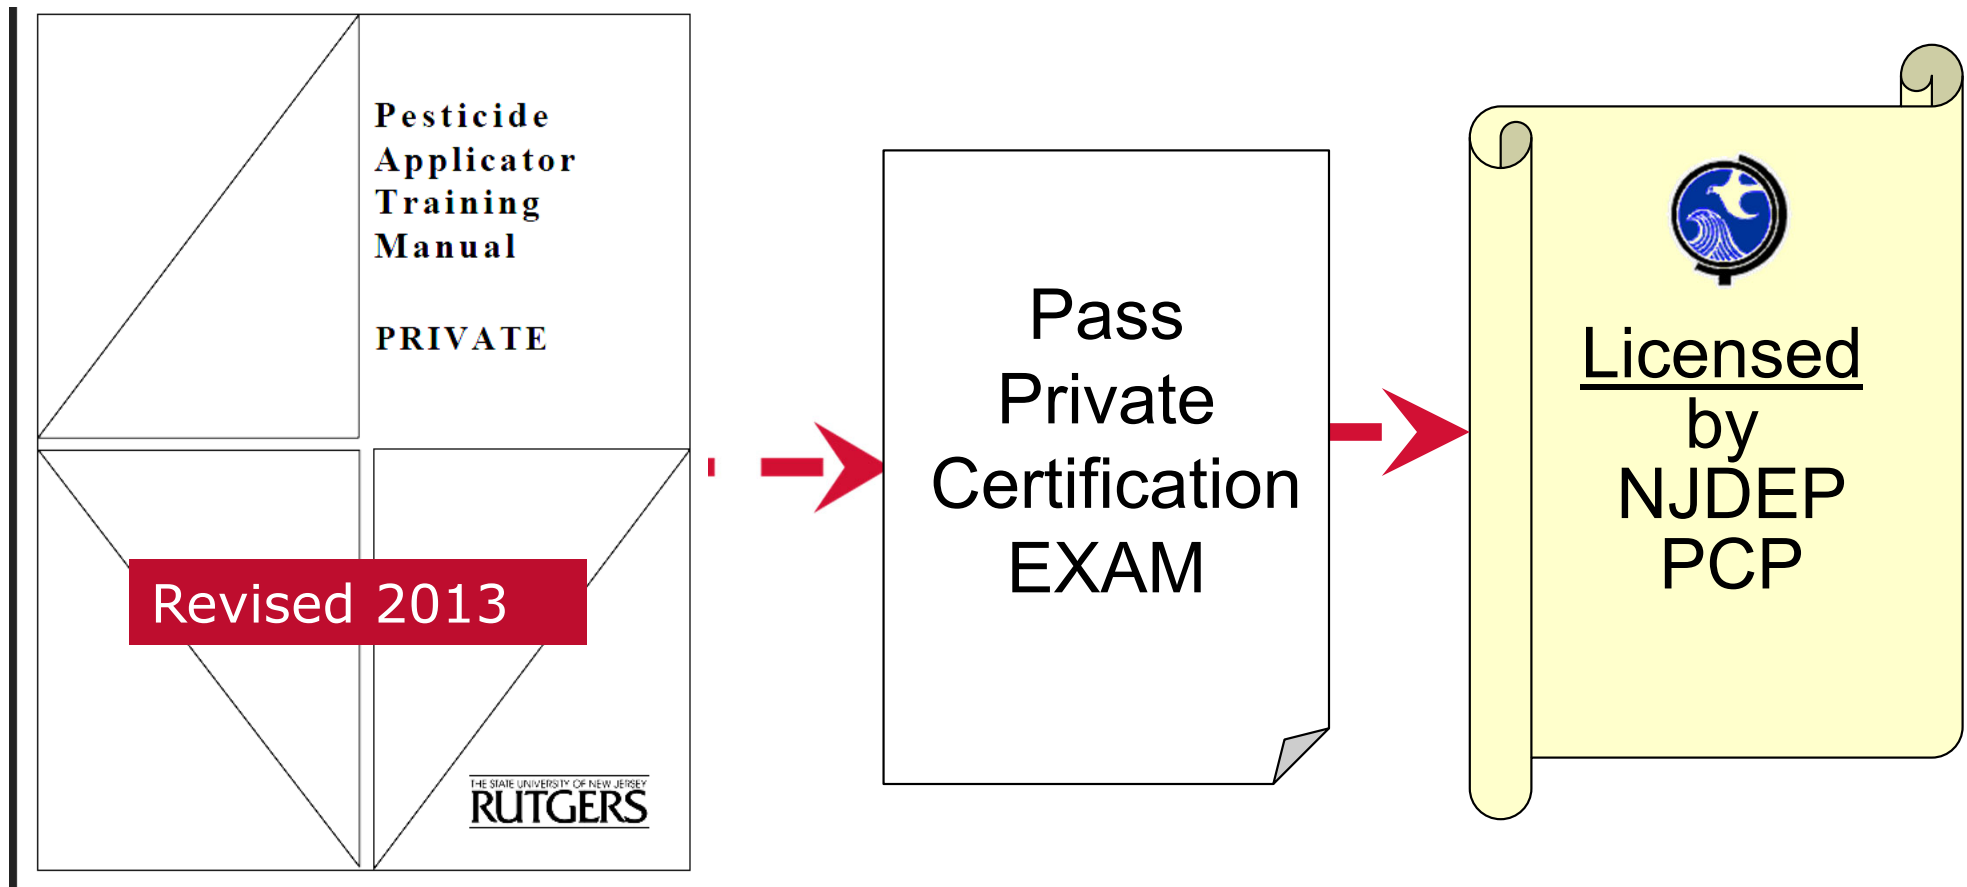

Any person who uses, or supervises the use, of any registered pesticide for the purpose of raising an agricultural commodity*.

The pesticide use can be on land owned or rented by the applicator or the applicator's employer.

Private applicators must **maintain list of handlers** operating under their applicator license.

- *
 - *certain exemptions per NJAC 7:30*
 - *requires Private licensing of home gardeners (who wish to use restricted use pesticides)*

Process to Obtain a NJ **Private** Pesticide Applicator's License

Includes RUP & GUP users (2001)

Home User Registration Login Exam Schedule

We are offering in-person testing options. Please see the "[Exam Schedule](#)" page for dates, times, and locations. Online exams are still available 24/7 and have minimum computer [requirements](#).

Create an Account & Submit Exam Applications

Before creating an account, gather the following information:

- Your personal and employer address information.
- Any trainer or license numbers.
- Scans of completed and signed affidavits, waivers, or other documentation in JPEG or PDF format.

Get started now by creating an [account](#).

Application Process

(Detailed steps to register are also available in "Help for Users" on this page under "Online Help")

- Create an Account (click on "User Registration" or "Account," in "Create an Account Box")
- Create Application (in top menu bar or click "Application" under "Welcome to Dashboard")
- Select exam(s); Upload required paperwork for selected exam(s)
- Schedule exam(s)-**SELECT ONLINE OPTION**; Pay for exam(s)
- Applications are reviewed; an email will be sent with application status.
 - Approved: two emails will be sent, one from **PACER**-instructions on the "Next Steps;" one from **Canvas**, notifications@instructure.com, with an invitation to the testing site.
 - If denied, an email will be sent with instructions on how to proceed.

Exams are hosted in Canvas; accessible 24/7. Grades will be available on the PACER "Dashboard."

What We Offer

This website provides everything you need for complete management of your pesticide license exam requirements. With an account, you can:

- Submit an application for NJDEP certification exams.
- Pay, schedule, and take your licensing exams online or in-person. (Please note: Exam payments are not refundable and online exams have minimum computer [requirements](#).)
- Receive notifications of your renewal deadlines.
- Have your results passed on to the NJDEP.

* Hardware and software [requirements](#) for online exams.

First Name: [REDACTED] A Last Name: [REDACTED] Suffix: [REDACTED]
 Birth Date: [REDACTED] Last 4 Numbers of SSN: [REDACTED]

License Holder's Mail Address:
 Address Line 1 (optional use-for apartment or business name): [REDACTED]
 Address Line 2 (mandatory-for PO-Box or street #): [REDACTED]
 City: GREAT MEADOWS State: NJ Zip Code: 07838
 Home Telephone #: [REDACTED] Sex: F Eye Color: BROWN Height-Feet: 5 Inches: 8

Employer Information (Pesticide Use Related Only):
 Employer Name: [REDACTED] Employer Phone #: [REDACTED]
 Employer Mail Address: [REDACTED]
 City: GREAT MEADOWS State: NJ Zip Code: 07838
 Employer Physical Address: [REDACTED]
 City: GREAT MEADOWS State: NJ County: WARREN

RECERTIFICATION INFORMATION
 Your certification has a minimum 5 year recertification period that ends the same date that your license expires. Your certification is made up of a Core subject area and a Category subject area (identified as PP2). Recertification is accomplished by attending recertification training. Training is required in Core subject matter and Category subject matter. There are 8 units of Core subject matter and 16 units of Category subject matter required over the 5 year recertification period. Each unit is worth 30 minutes of training-time. See the enclosed information letter for details.

PRIVATE PESTICIDE APPLICATOR LICENSE RENEWAL NOTICE

You are scheduled to **LOSE** your Private Pesticide Applicator license on **October 31, 2018**.

WHY?

You do not yet have the required number of Core or Private Part 2 recertification units due by October 31, 2018.

To be eligible to receive your renewal invoice for the license period November 1, 2018 to October 31, 2023 you must do **one of the following by October 31, 2018**:

- Attend approved courses and accumulate a total of 8 units of Core credit and 16 units of Private Part 2 credit
- OR
- Retake and pass the Private Pesticide Applicator exam.

TO CHECK YOUR RECERTIFICATION STATUS, COURSES, AND EXAM SIGN-UP INFORMATION

GO TO: www.pcpnj.org and click on "Pesticides" under About Us

To check your credits and recertification status:

Choose "Check Your Credit and Course History – Private Applicators" under Credits and Courses

Note: Credits for any recertification courses taken in the previous three weeks may not be posted yet.

For available recertification courses:

- Choose Online Reports under Online Payments and Reports
- Then choose **RECERTIFICATION COURSES AVAILABLE** at the bottom of the page and enter the requested information.

To register to retake the Private Pesticide Applicator exam:

- Choose Sign-Up under Exams
- Click on **Part 2. Private Pesticide Applicator** and complete and mail in an application.

If you require any further information, please visit our website at www.pcpnj.org. or call 609-984-6507.

PRIVATE APPLICATOR LICENSE RENEWAL NOTICE

If you do **NOT** attend the recertification training to achieve the minimum number of recertification credits required, instead of an invoice at the end of 5 years, DEP sends this **written notice** that you will lose your license on **October 31st unless** you take the courses needed or retake the Private Pesticide Applicator Exam.

It is illegal for you to use or supervise use of pesticides without a license.

We urge you to check now, and will be glad to help...

EPA
United States Environmental Protection Agency

How to Comply With the 2015 Revised Worker Protection Standard for Agricultural Pesticides

What Owners and Employers Need To Know

QUICK REFERENCE GUIDE TO THE WORKER PROTECTION STANDARD (WPS) AS REVISED IN 2015

The guide summarizes the maximum requirements under the revised WPS. It does not include exemptions and responses that may allow you to do less. See the referenced sections below.

Exemptions (general) 170.303 (a) and 170.301

Exemptions for workers 170.401 (a) and 170.402 (a)(2)

Exemptions for early-entry workers during a restricted-entry interval 170.403

Exemptions for handlers 170.501 (b)

Exemptions to PPE required on pesticide labels 170.602

Employer Responsibilities for Supervisors and Labor Contractors

Employers must provide sufficient information to supervisors and/or labor contractors to ensure compliance with the revised WPS. Specifically:

- The tasks supervisor/labor contractors must do, and
- The information they must provide to workers/handlers.

Employers are liable for a penalty under FIFRA if a supervisor or labor contractor acting for them fails to comply with the revised WPS requirements. 170.309 (a), 170.313 (a), 170.317 (a)

<http://pesticidesources.org/wps/htc/index.html>

Duties for ALL Employers

These requirements apply to agricultural employers and commercial pesticide handler employers except the pesticide safety, application and hazard information requirements apply only to agricultural employers.

Anti-Retaliation

Employers must not retaliate against a worker or handler who attempts to comply with the WPS, files a complaint, or provides information in an investigation of alleged WPS noncompliance. 170.315

Minimum Age Requirements

- Ensure that early-entry workers and all handlers are at least 18 years old. 170.309 (a) and 170.313 (a)

Pesticide Safety, Application and Hazard Information

An agricultural employer must display or make certain information available on the establishment. Commercial pesticide handler employers do not have to comply with information display requirements.

- Display or make available all of the information listed in #2 together in an easily accessible ("central") location on the agricultural establishment. 170.311 (a)(3) and 170.311 (b)(2)

The information includes:

- EPA WPS safety poster or equivalent information, which must include some additional information by January 2, 2018, and must be kept current. 170.311 (a)
- Application information that includes:
 - Product name, EPA registration number, and active ingredient
 - Crop or site treated, location and description of the treated area
 - Date, start and end times of the application, and duration of restricted-entry interval (REI). 170.311 (b)(1)
- A copy of the safety data sheet (SDS) for the formulated product for each WPS-labeled pesticide applied. 170.309 and 170.311

- In addition, display the EPA WPS safety poster (or equivalent) where decontamination supplies are located at permanent sites and where decontamination supplies are provided for 11 or more workers. 170.311 (a)(3)
- Allow workers and handlers unrestricted access to all of the information and keep all of the displayed information current and legible. 170.311 (b)(5) (i) and 170.311 (b)(5) (ii)
- Display the EPA WPS safety poster or equivalent information before an application takes place and be 30 days after the REI expires. 170.309 (a)
- Display the SDS and application information within 24 hours of the application and before workers enter treated areas. This information must be displayed for 30 days after the REI expires and kept in records on the agricultural establishment until 2 years after the REI expires. 170.309 (a)(a), and 170.311 (b)(5) (b)
- Provide the SDS and application information upon request of a worker, handler, designated representative or medical personnel, within 15 days. 170.311 (b)(7) (d)

Pesticide Safety Training

Ensure that workers are trained before performing tasks in a pesticide treated area (REI) in effect within the last 30 days. 170.401 (a). Ensure that handlers are trained before performing any handler activity. 170.501 (a). There is no grace period for worker or handler training.

- Train workers and handlers annually. 170.401 (a) and 170.501 (a)
- Present training using EPA-approved materials either orally from written materials or audio-visually. After January 2, 2018, the training must cover additional topics. 170.401 (a) and 170.501 (a)
- Trainers must be certified applicators or have completed an EPA-approved train-the-trainer program or be designated by the State or Tribal pesticide enforcement agency. 170.401 (a)(a) and 170.501 (a)(a)
- Trainers must be trained in a manner the employees can understand, and the trainer must be present and respond to questions. 170.401 (a)(a)(i) and 170.501 (a)(a)(i)
- Maintain training records on the establishment for two years from the training date for each worker and handler required to be trained on the agricultural establishment. 170.401 (a) and 170.501 (a)

Continued on next column

This is a summary of the requirements. It does not contain all the information to comply with the revised WPS. Refer to the regulations where indicated for complete details.

<http://pesticidesources.org/wps/hotd/compliance-requirement-schedule.pdf>

Revised Worker Protection Standard Compliance Requirements
January 2017

Training

- Annual training is required for workers and handlers.
- Worker training grace period is eliminated. Workers must be trained before they work in an area where a pesticide has been used or a restricted-entry interval has been in effect in the past 30 days.
- Trainers must be certified applicators or have completed an EPA-approved train-the-trainer program or be designated by the State or Tribal pesticide enforcement agency.
- Train-the-trainer programs and training materials must be EPA-approved.
- Employers must keep training records for 2 years and give a copy to workers and handlers upon request.

Hazard Communication

- Employers must display application information and safety data sheets (SDS) at a central location within 24 hours of end of application and before workers enter that treated area. Display both for 30 days after REI expires. Keep records of application information and SDS for 2 years from end of REI and make available to workers, handlers, designated representatives (identified in writing) or medical personnel upon request.

Basic Pesticide Safety Information

- Display pesticide safety information at a central location and at sites where decontamination supplies are located, if the decontamination supplies are at a permanent site or at a location with 11 or more workers.

Notification of Treated Areas

- Post warning sign if REI is greater than 48 hours (outdoor applications) or 4 hours (enclosed space applications), otherwise option for posting or oral notification unless label requires both ("double notification").
- Agricultural employer must provide information to a commercial pesticide handler employer on treated areas the commercial handler may be in (or walk within 1/4 mile of). Commercial pesticide handler employer must provide application-related information to agricultural employer before the application begins and provide updates for certain changes before the application and within 2 hours of end of application for most other changes, unless only change was less than 1-hour difference in application time.

Minimum Age

- Handlers and early-entry workers must be at least 18 years old. (Members of owner's immediate family are exempt from this and most other requirements of the WPS.)

Entry Restrictions during Application for Outdoor Production

- Ag employers must not allow entry into treated area or the application exclusion zone, which is an area up to 100 feet area around the application equipment during outdoor pesticide application on farms, forests, and nurseries. Size of the application exclusion zone depends on type of application. (See the WPS regulation for revised descriptions of application methods.)

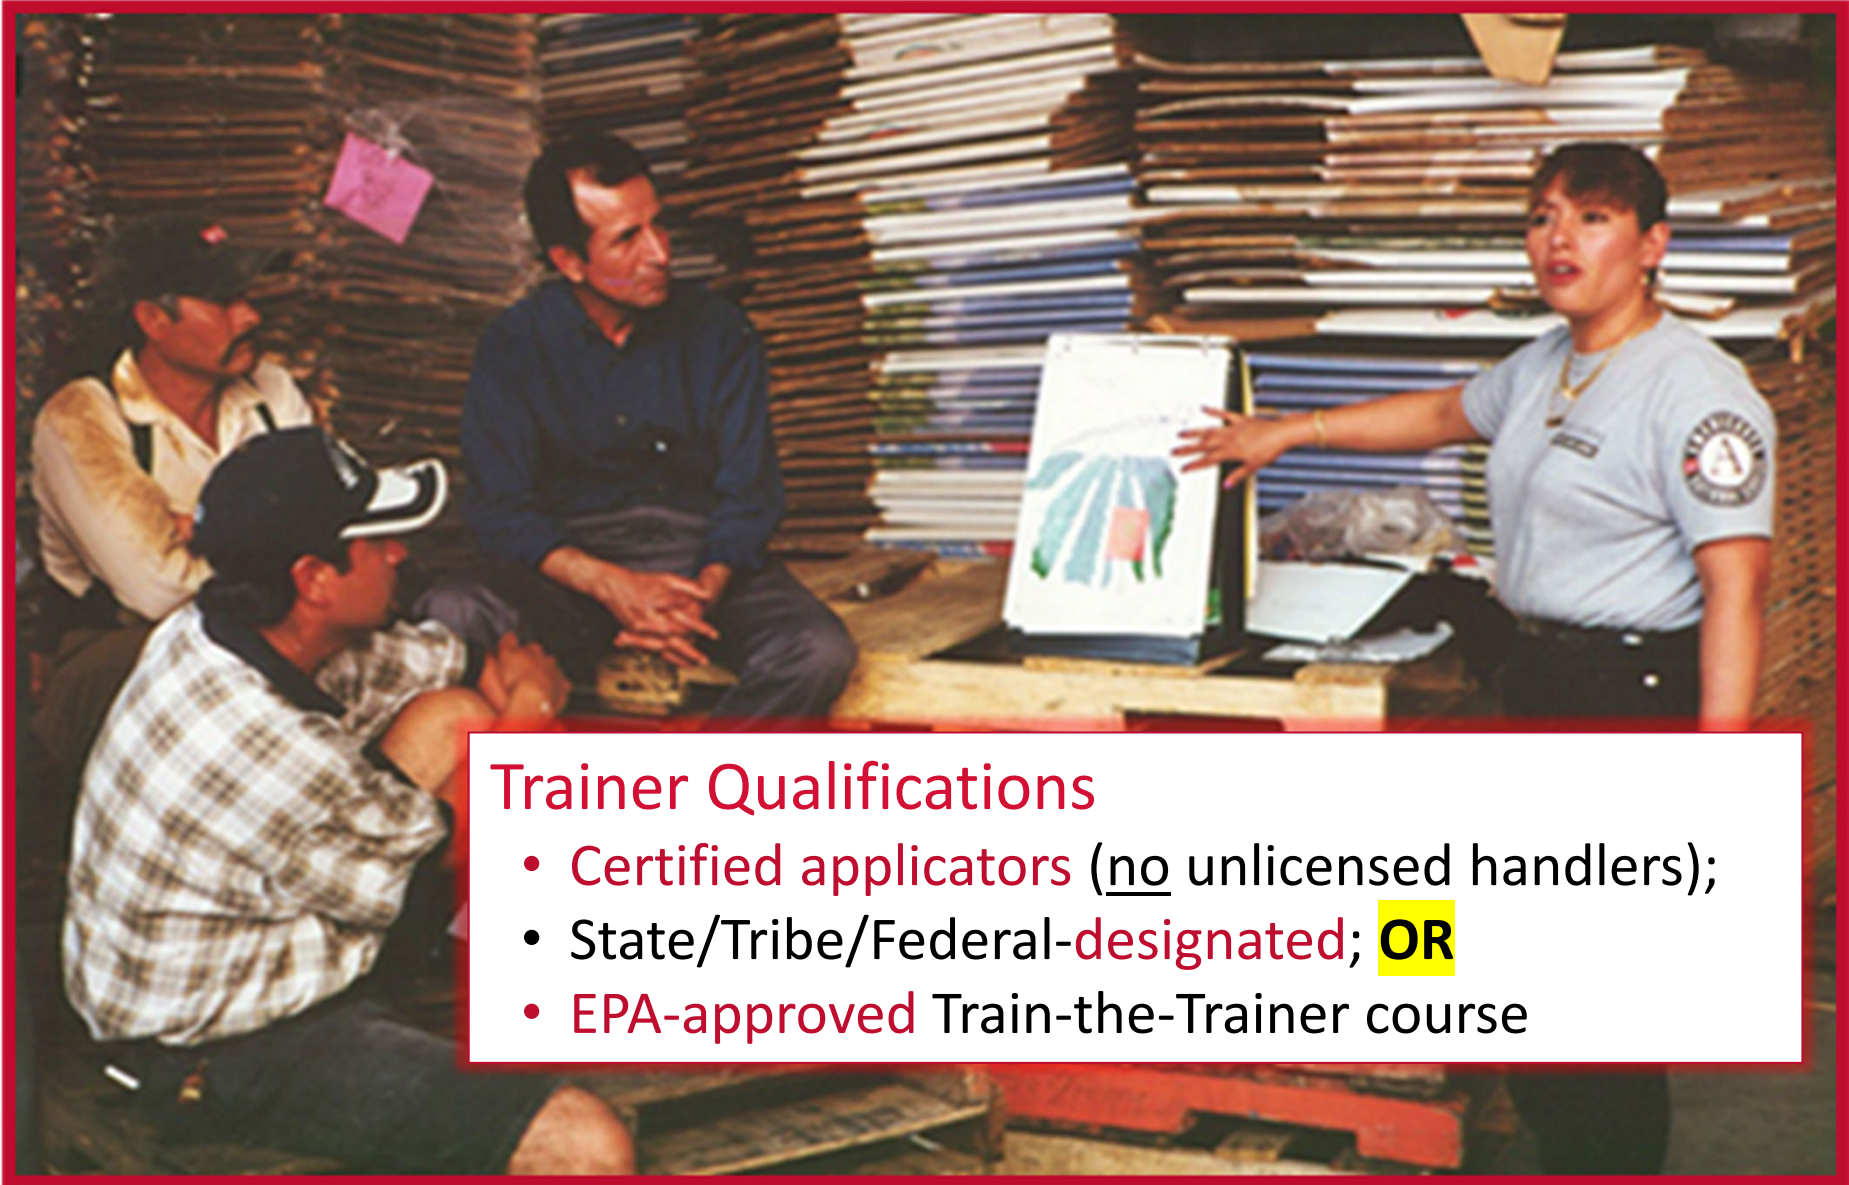

Exemptions and Exceptions

- Only certified crop advisors are exempt from label-required PPE. Certified crop advisor ~~employees~~ must use label-required PPE or PPE substitutions allowed by the WPS while working in a field during an REI, and the employer must provide all required WPS protections. (PPE described below.)
- REI and notification requirements for early-entry workers: Notify early-entry workers of application specifics, tasks to be performed, conditions of the early-entry exception, and hazard information from the pesticide label.

Personal Protective Equipment

- Respirators - Employer must provide respirator and fit testing, training, and medical evaluation that conforms to OSHA standards for any handler required to wear any respirator by the labeling. Requires recordkeeping of completion of fit test, training, and medical evaluation.
- PPE exception for closed systems - Exceptions to labeling-specified PPE allowed for handlers when using closed systems. A closed system must meet a broad performance-based standard and basic operating standards (written operating instructions and training of handlers in use of the system) must be provided.
- PPE exception for crop advisors and their employees - Crop advisors and their employees entering treated areas while a REI is in effect to conduct crop-advisor tasks may wear a standard set of PPE (coveralls, shoes plus socks and chemical-resistant gloves made of any waterproof material, and eye protection if the labeling

Revised NJDEP
Regulations
require posting of :

1. Safety Information
2. Hazard Information

Rutgers PSEP WPS Central Posting Area "Pesticide Safety Information" Infoaraphic

7:30-12.9 Posted pesticide safety information

(a) When workers are on an agricultural establishment and, within the last 30 days a pesticide covered by this subchapter has been applied on the establishment or a restricted-entry interval has been in effect, the agricultural employer shall display, in accordance with this section, pesticide safety information. The safety information shall convey, in a manner the workers can understand, all of the following points:

1. Help keep pesticides from entering your body. At a minimum, the following points shall be conveyed:

- i. Avoid getting on your skin or into your body any pesticides that may be on or in plants, soil, irrigation water, tractors and other equipment, or used personal protective equipment, or pesticides drifting from nearby applications.
- ii. Wash before eating, drinking, using chewing gum or tobacco, or using the toilet.
- iii. Wear work clothing that protects the body from pesticide residues (long-sleeved shirts, long pants, shoes and socks, and a hat or scarf).
- iv. Wash/shower with soap and water, shampoo hair, and put on clean clothes after work.
- v. Wash work clothes separately from other clothes before wearing them again.
- vi. If pesticides are spilled or sprayed on the body, use decontamination supplies to wash immediately, or rinse off in the nearest clean water, including springs, streams, lakes, or other sources if more readily available than decontamination supplies, and, as soon as possible, wash or shower with soap and water, shampoo hair, and change into clean clothes.
- vii. Follow directions about keeping out of treated areas and application exclusion zones.
- viii. Instructions to employees to seek medical attention as soon as possible if they believe they have been poisoned, injured, or made ill by pesticides.
- ix. The following contact information for **New Jersey's pesticide regulatory agency**:

New Jersey Department of Environmental Protection
 Bureau of Pesticide Compliance and Enforcement
 Mail Code 401-04A
 401 East State Street
 PO Box 420
 Trenton, New Jersey 08625-0420
 Telephone: (609) 984-6568
 Internet address: <http://www.nj.gov/dep/enforcement/pcp/pcp-wps.htm>

2. There are Federal/State rules to protect workers and handlers, including a requirement for safety training.
3. The name, address, and telephone number of a nearby operating medical care facility capable of providing emergency medical treatment. This information shall be clearly identified as emergency medical contact information on the display.
 - i. The agricultural employer shall update the pesticide safety information display within 24 hours of notice of any change to the information on emergency medical care facilities.

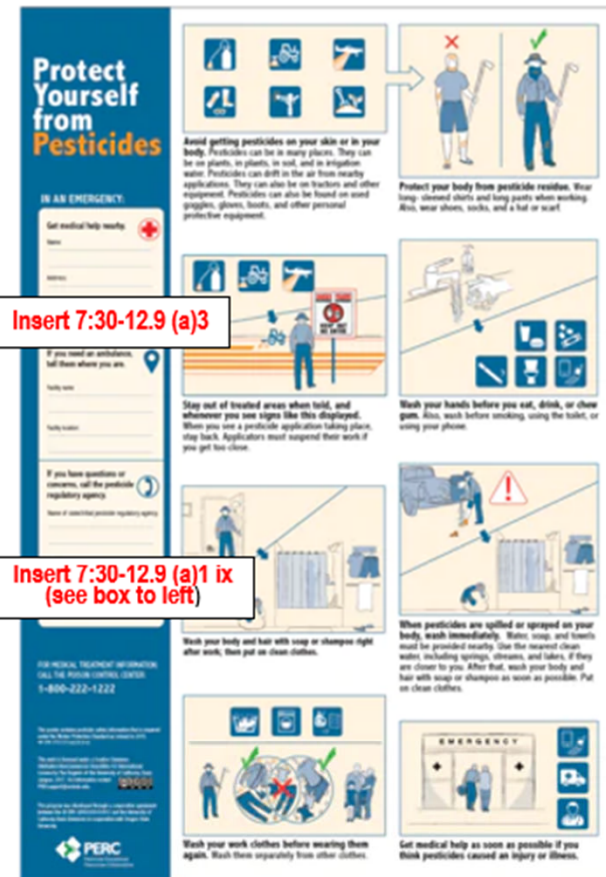

(b) The pesticide safety information shall be displayed at each of the following sites on the agricultural establishment:

1. A location where it can be readily seen and read by workers and where workers are likely to congregate or pass by.
2. Locations on the agricultural establishment where decontamination supplies shall be provided, but only when the decontamination supplies are located at permanent sites or being provided at locations and in quantities to meet the requirements for 11 or more workers.

(c) Workers shall be informed of the location of the information and shall be allowed access to it at all times during normal work hours.

(d) The information shall remain legible during the time it is posted.

Central Posting Area: New Jersey Worker Protection Requirements for Posted Pesticide Safety Information Using the PERC 'Protect Yourself from Pesticides' poster

WPS Poster Source: <https://npsecstore.com/collections/posters>

Central display of hazard information

1. **Application**-specific information
2. Pesticide **safety data sheets (new)**

Application information posted

1. REI & when re-entry is allowed
2. **prior*** to application
3. until 30 days after REI expires

Retain **application info & SDS** for **3 yrs*** accessible to:

- Employee (oral or written request)
- Treating medical personnel (oral or written request)
- Designated representative (written request only)

*New Jersey** *2019 Revised Regulations*

7:30-12.6 Providing specific information about applications (2020 regulatory changes in red)

www.nj.gov/dep/enforcement/pcp/regulations/Subchapter%2012%20Changes%20in%20Red%202020.pdf

- (a) When workers are on an agricultural establishment and, within the last 30 days, a pesticide covered by this subchapter has been applied on the establishment, or a restricted-entry interval has been in effect, the agricultural employer shall display, in accordance with this section, specific information about the pesticide.
- (b) The information shall be displayed in the location specified for the pesticide safety information in N.J.A.C. 7:30-12.9(b) and shall be accessible and legible.
- (c) If warning signs are posted for the treated area before an application, the specific application information for that application shall be posted at the same time or earlier.
 1. The information shall be posted before the application takes place, if workers will be on the establishment during application. Otherwise, the information shall be posted at the beginning of any worker's first work period.
 2. The information displayed shall continue to be displayed for at least 30 days after the end of the restricted-entry interval; or if there is no restricted-entry interval, for at least 30 days after the end of the application; or, at least until workers are no longer on the establishment, whichever is earlier.
- (d) The information shall include:
 1. The location and description of the treated area.
 - i. The crop or site treated.
 - ii. The location of the application, to be shown on the map required in 12.6(d)6 below;
 2. The pesticide brand or trade name, EPA Registration Number, active ingredient(s) of the pesticide, and the pesticide safety data sheet;
 3. The time and date the pesticide application is starting and ending;
 4. The restricted-entry interval for the pesticide and the exact date and time for safe re-entry by workers and handlers;
 5. The posted information, pursuant to (d)1, 2, 3 and 4 above shall have the following column headings printed in English and in the native language(s) understood by farm workers employed by the farm:
 - i. Crop;
 - ii. Name of Pesticide;
 - iii. Safe Reentry Time;
 - iv. Application date;
 - v. Application start and finish time; and
 - vi. Application Location.
 6. A map of the farm shall be posted at the same location as the written information designated in (d)1 above and shall be used to clearly designate the fields treated with pesticides;
 7. The Department will develop and make available an example format for proper posting of written information. This example will be made available through agriculture-related organizations including the New Jersey Department of Agriculture, Rutgers Cooperative Extension, and the New Jersey Farm Bureau and posted by the Department at <http://www.nj.gov/dep/enforcement/pcp/pcp-wps.htm>. In lieu of the example format developed by the Department, a farm owner or lessee may use a different format if it conforms to the requirements of this subsection.
- (e) Whenever pesticide safety information and pesticide application and hazard information are required to be displayed in accordance with this section, the agricultural employer shall retain the pesticide application and hazard information required pursuant to (d) above on the agricultural establishment for three years after the date of expiration of the restricted-entry interval applicable to the pesticide application conducted.
